COOPERATIVE EXTENSION SERVICE

THE UNIVERSITY OF GEORGIA COLLEGE OF AGRICULTURE/ATHENS, GEORGIA 30602

Office of the Director

Dear Friends:

In the past several years Georgia has experienced rapid population growth, economic expansion, and a renewed interest in the importance of educating our youth. These changes will not only affect our daily lives but will influence how we plan for the future.

In order to help Georgians understand how our state is growing and changing, The University of Georgia's Extension Service has developed the Georgia County Guide. The Guide represents an effort to supply current information to decision makers and interested citizens concerned about Georgia's future.

The 1985 County Guide is one of several efforts by the Cooperative Extension Service to provide information and assistance to the State of Georgia and its' local units of government. For more information on assistance available, contact any county Extension office.

Sincerely,

Tal C. DuVall

NOTES 163-164

SOURCES 165-168

Editor's Note:

The 1985 Georgia County Guide contains 70 tables of agricultural, educational, economic and demographic facts and figures for all 159 of Georgia's counties, plus 19 maps collected from 31 federal and state agencies and 6 private corporations.

The principal concern is that the Georgia County Guide should be an accurate, up-to-date and easy to use reference work. The contents of this publication can be reprinted or otherwise used without written or oral authorization, but acknowledgement of the proper source would be appreciated. Individuals and organizations are encouraged to use the material for information purposes.

Help and cooperation on this publication came from government agencies, private industries and individuals. Thanks are offered to the Cooperative Extension Service for logistical, secretarial and professional support. The Kelley Manufacturing Company, Tifton, Georgia, provided an Olivetti M-20 Microcomputer for data processing. Sincere appreciation is also extended to the many agencies who contributed information for this year's publication.

A special thanks to William M. White. This year's book would have never been completed without his valuable knowlege, keen insight and patience. His total contribution is deeply appreciated.

A special thanks to Dr. L. Edward White, Head, Rural Development Center and Conferences, for his administrative support. Thanks must be given to Carol Durr, Annette Thompson, Ann Grubbs, Glenda Davis and Betty Peacock for all of their help. In addition, Roger Nalls, General Manager, Kelley Manufacturing Company Farm Data Systems, Tifton, also provided vital assistance.

The maps were produced by Dennis Rains, Cartographic Technician, Department of Geography, The University of Georgia.

Suggestions from users plus the development of a better system to manipulate the data have enabled us to improve and expand the format. Comments, corrections and suggestions for additions or improvements of this work are invited.

The cover was designed by Vincent Keesee. According to early explorers, buffaloes once roamed in Georgia and they are just one facet of Georgia's interesting and rich heritage.

[1] Commitment of a child to the Department of Human Resources was instituted by law in 1963 and implemented by the Division of Youth Services in 1965. It is often the final disposition of the Juvenile Court when probation or other counseling services have failed to prevent a chronic or serious offender from returning to the attention of the court.

* Metropolitan County

[1] Rank: 1 = lowest

[2] See Notes (page 184)

NOTES

In every table counties with an asterisk (*) beside their name are metropolitan counties.

A metropolitan county is a county that is part of a Metropolitan Statistical Area (MSA). All other counties are nonmetropolitan counties. In 1985 Georgia had 38 metropolitan and 121 nonmetropolitan counties.

The general concept of a metropolitan area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus.

Each MSA has one or more central counties containing the area's main population concentration: an urbanized area with at least 50,000 inhabitants. An MSA may also include outlying counties which have close economic and social relationships with the central counties.

Pages 16-17 **AGRICULTURE**
Number of Farms, Harvested Cropland: 1974, 1978, 1982

A farm, as defined for the 1978 and 1982 census, is any place from which $1000 or more of agricultural products were sold or normally would have been sold, during the census year.

The previous definition (used for the 1959, 1964, and 1969 censuses, and for the 1974 preliminary county reports) counted as farm any place with less than 10 acres from which $250 or more of agricultural products were sold or normally would have been sold during the census year, or any place of 10 acres or more from which $50 or more of agricultural products were sold or normally would have been sold during the census year.

Superior Courts' Case Loads: 1984

[1]Indictments and accusations docketed in the court in the fiscal year.

[2]Terminations of cases in the fiscal year. When dispositions exceed the filings, this indicates the termination of cases which has been filed in the fiscal year and cases in the previous years.

[3]Indicates the docketing of the complaint or petition that initiates the case. Civil dockets include the majority of all civil actions before the court including contracts, torts, domestic relations, and routine proceedings such as garnishments, foreclosures, and dispossessories.

[4]Termination of the action. This includes settlements, dismissals, before trial judgments as well as trial termination.

[5]Backlog: criminal cases 4 months to 6 years; civil cases 6 months to 6 years.

New Privately Owned Housing Units Authorized in Permit-Issuing Places: 1978-1983

The information contained in this table was collected from approximately 16,000 places identified as permit-issuing in 1978. This universe accounts for a major portion of new residential housing units started in the United States. In 1979, about 88 percent of all new private housing intended for occupancy on a housekeeping basis was constructed within permit-issuing places.
